

CHECKLIST | SKILLS GAP ANALYSIS

Presented by Foundation Benefits

A skills gap analysis can help determine which skills and knowledge are lacking among employees on an individual level or within a team, a department or the overall organization. This analysis can even go one step further and look at the industry as a whole. Once equipped with this information, employers can address the skills gap in the organization through hiring, upskilling, reskilling and other learning and development initiatives. This exercise can also help inform and shape recruitment efforts and strategic workforce planning.

Employers can review this checklist as they conduct a skills gap analysis. The need for such an analysis could be triggered by various workplace processes, including before a big project, during hiring planning or when launching learning and development initiatives. Alternatively, a skills gap analysis could simply be done periodically.

Research	
Identify or categorize the types of employee skills. For example: <ul style="list-style-type: none">• Leadership• Problem-solving• Soft skills (e.g., communication and emotional intelligence)• Technical skills• Technology	<input type="checkbox"/>
Measure employees' existing skills. Some examples of measurement methods include: <ul style="list-style-type: none">• Performance reviews• 360-degree reviews• Conversations with key managers• Employees' past work experience• Employee degrees, certifications and education• Self-assessments• Employee interviews• Technology (e.g., skills management software and learning management systems)	<input type="checkbox"/>
Consider how evolving and future trends might impact future skills in your company or industry. <ul style="list-style-type: none">• What required skills will change due to technology?• How does the economy impact skills?• How would potential company or industry growth (or consolidation) impact skills?	<input type="checkbox"/>

This checklist is merely a guideline. It is neither meant to be exhaustive nor meant to be construed as legal advice. It does not address all potential compliance issues with federal, state or local standards. <p>Identify future skills needed in your company or industry. Answering these questions can help:</p> <ul style="list-style-type: none"> • What skills do we value as a company? • What skills do our employees need to do their jobs well now? • What skills do our employees need to do their job well in the future? 	<input type="checkbox"/>
<p>Rate current and future skills based on their importance.</p>	<input type="checkbox"/>
<p>Set goals and develop a plan to use the analysis data.</p> <ul style="list-style-type: none"> • Train to fill skills gaps (e.g., upskilling, reskilling, mentoring, attending events and pursuing outside educational opportunities). • Hire to fill skills gaps (e.g., sourcing passive candidates, using structured interviews to reduce bias and modifying the hiring process). 	<input type="checkbox"/>
<p>Determine programs and define learning pathways that best support the development of the desired skills, if applicable. It may be helpful to start small with one department or team.</p>	<input type="checkbox"/>

Implementation and Management

<p>Modify processes or strategies, if applicable. For example:</p> <ul style="list-style-type: none"> • Update a recruitment strategy. • Modify a hiring process. • Update a screening process to account for skills the company needs. • Recreate a learning and development strategy. • Train employees on a deficient skill for a current or future need. • Develop specific training programs. 	<input type="checkbox"/>
<p>Communicate your findings, goals and learning opportunities to employees.</p>	<input type="checkbox"/>
<p>Execute the plan developed from the analysis.</p>	<input type="checkbox"/>
<p>Encourage companywide conversations about skills—instead of just jobs or roles.</p>	<input type="checkbox"/>
<p>Perform ongoing skills gap analyses to measure progress and identify new or changing skills.</p>	<input type="checkbox"/>
